

ANUJ KUMAR

Full Stack Developer

+91 8874308831 anujkeshri449@gmail.com GitHub LinkedIn Portfolio

Professional Summary

Motivated Full Stack Developer with expertise in **React.js**, **Node.js**, **Express.js**, **MongoDB**, **SQL**, and **JavaScript**. Familiar with **Generative AI**, prompt engineering, LLM integration, and AI APIs to build intelligent web applications. Strong foundation in REST APIs, Git, and problem-solving, with a passion for developing scalable, AI-powered software solutions. Seeking an entry-level Full Stack Developer role to contribute and grow as a software engineer.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Passout 2026

Parul University, Gujarat, India

TECHNICAL SKILLS

Languages:	Core Java, JavaScript , TypeScript, Python, SQL
Backend:	Node.js , Express.js, REST APIs , JWT , Fast API, Flask, API Integration
Frontend:	React.js , Next.js, Tailwind CSS, HTML5 , CSS3 , Bootstrap, Redux Toolkit
Databases:	MySQL, PostgreSQL , MongoDB , Supabase
Generative AI:	Vector Databases (ChromaDB, FAISS), LangChain, Retrieval-Augmented Generation (RAG) , Prompt Engineering, LLM API Integration
DevOps & Tools:	Git, GitHub Actions, CI/CD, Docker Linux , AWS , OpenAI API, Google Gemini API

EXPERIENCE

Full Stack Developer Intern

Jan 2026 – April 2026

Xeno Tech Solutions

- Developed and maintained 4 production-ready full-stack web applications using React.js, Node.js, Express.js, and MongoDB, reducing feature delivery time by 20
- Designed and implemented 18+ RESTful APIs, reducing average API response time by 30
- Optimized MongoDB queries and indexing, improving data retrieval performance by 35
- Implemented JWT-based authentication and role-based authorization, securing access for over 1,000 registered users.
- Collaborated with a team of 5 developers using Git and GitHub, contributing over 120 commits and participating in code reviews.

PROJECTS

AI Email Writing Assistant

Personal Project

- Enhanced a full-stack AI-powered Email Writing Assistant using **React**, **Node.js**, Express, MongoDB, and OpenAI AP
- Enforced **JWT authentication**, email generation, grammar correction, tone customization, and email history management.

Blockchain Based Voting System

Academic Project

- Developed a secure online voting system using **Blockchain** technology to ensure transparency, data integrity, and tamper-proof vote recording.
- Executed **user authentication**, voter verification, vote encryption, and immutable vote storage to prevent duplicate or fraudulent voting.
- Designed an intuitive web interface for voters and an admin dashboard to manage elections and monitor voting statistics.

Achievements

- Participated in the **Odoo Hackathon** and collaborated in a team to build innovative software solutions.
- Completed NPTEL certifications in **Internet of Things and Computer Networks**.
- Solved **100+** coding problems on **LeetCode** covering Data Structures and Algorithms.
